Sprint 4 Report

Sprint Completion:

December 3, 2017

Actions to Stop Doing:

1. Stop planning too many user stories for a sprint. Focus more on a few specific categories and finish them completely.
2. Stop having meetings so close to each other, since not much work gets done between Monday and Tuesday.

Actions to Start Doing:

1. Start earlier on large tasks to get a better idea of their scope. This will give a better estimate of how long things will take earlier in the sprint.
2. Start communicating more online about how one's code is set up, either through documentation or Slack.

Actions to Keep Doing:

1. Continue to show up to meetings on time. Everyone in the group has been extremely punctual and this shows dedication to the project despite busy schedules.

Work Completed:

1. As a user I want better usability.
2. As a user I want a good looking app (polish)

Work Not Completed:

1. As a User, I want to retain functionality from previous Sprints.
2. As a user I want to clearly see and interact with my tasks in a list
3. As a developer I want the behind the scenes code to be functional

Completion Rate:

2/5 User Stories completed fully.

37 Estimated ideal work hours.

14 Total days.

1/7 User Stories completed per day.

51/14 Actual ideal work hours per day.

Scrum Master:

Sean Corzine
